

Newsletter

We are thrilled to bring you the inaugural edition of the Kiona Foundation's quarterly newsletter. Our goal is to keep you informed and engaged with the latest updates, fundraising initiatives, and upcoming events. Your continued support and involvement are crucial to our mission, and we hope this newsletter helps strengthen our community.

FUNDRAISING INITIATIVES

Your donations are vital in supporting our research and educational campaigns.

MONTH OF AWARENESS

September is Nation Childhood Cancer Awareness Month and we're gearing up for our first annual Fight for hope initiative

RESEARCH UPDATES

We're excited to share that our research team has submitted the OCM research application.

HOW YOU CAN SUPPORT:

- **Donate:** Your generous donations help fund our research initiatives, support services, and educational programs. Every contribution, no matter the size, brings us closer to a world without cancer.
- **Volunteer:** Join our dedicated team of volunteers and lend your time and skills to our various programs and events. Your involvement is invaluable and greatly appreciated.
- **Fundraise:** Organize or participate in fundraising events to support the Kiona Foundation. Whether it's a walk, run, bake sale, or online campaign, your efforts help raise crucial funds and awareness.
- **Spread the Word:** Follow us on social media, share our posts, and encourage your friends and family to get involved. Raising awareness is a powerful way to support our cause.
- **Partner with Us:** If you represent an organization, consider partnering with the Kiona Foundation to expand our outreach and impact. Together, we can achieve more.

Our Fundraising Initiatives

April: Cancer Prevention and Early Detection Month

This month, we are focusing on raising awareness about the importance of early detection and preventive measures. Your donations are vital in supporting our research and educational programs.

Research Updates

We are excited to share that our research team has made significant progress in understanding the genetic markers of certain cancers. This breakthrough could lead to more effective treatments and early detection methods.
